

**If the war in Iraq
never happened,
1,236,640 Iraqi people
would still be alive...**

**Over 4,119 American
service people
would still be alive.**

**With your help, no more
people have to die.**

**Stop the war with Iran
before it starts!**

**He wants
to start
another war.**

***We strongly
oppose it.***

**Stop the war with Iran
before it starts!**

**Did you know
Iran has an offer on
the table for
negotiations with the
United States that
could resolve the
nuclear stand-off
and other issues?**

**Stop the war with Iran
before it starts!**

But George Bush is goin' with his "gut" on this one.

Our own Intelligence agencies say Iran has no nuclear weapons program. The International Atomic Energy Agency says Iran has no nuclear weapons program.

But George Bush doesn't believe them. He says they do. He doesn't believe his own Central Intelligence Agency, his own National Security Agency. He's goin' with his "gut" on this one. Just like he did in Iraq. Remember? George Bush insisted that Iraq had stockpiles of Weapons of Mass Destruction. He suggested that Saddam Hussein supported Al Quaida and was connected, somehow, to the 9/11 attacks. He said the threat to our country was imminent and we had to go to war. There was only one problem: *Every one of these claims was false.* And look where it's gotten us. Thousands of our troops have died. Over a million innocent Iraqi civilians have died. And we are less safe than before. Our country is more hated and feared all over the world than ever before. Our government now condones the kidnapping and torture of suspects. We hold prisoners for years without trial, without the opportunity to challenge their detention or the "evidence" against them. On the President's word alone, any one of us can be labeled an "Enemy Combatant," and lose every one of our Constitutional rights.

What else? We are fighting the war in Iraq with borrowed money, and the national debt is so high that it threatens our economic stability. And many of us may not be able to heat our homes this winter, because oil costs six times what it did when Bush came into office. And if the U.S. attacks Iran, experts say the price of oil could double over what it is right now!

Is this the America you want? If not, write, call, and email the President, your Senators, and your Congressional representatives. Tell them all this must stop! Tell them you won't stand for a war in Iran. Tell them they must turn this country around or lose your vote forever.

One last note: John McCain would continue every one of George Bush's policies.

You can make a difference.

Don't let him get away with it!

- Write letters to President Bush, Vice President Cheney, US Secretary of State Condoleezza Rice, US Secretary of Defense Robert Michael Gates, United Nations Secretary General Ban-Ki-Moon, your Senators and Congressional representatives. Tell them you won't stand for war in Iran!
- Discuss this issue with your family and friends. Ask them to join the campaign against the attack on Iran. Every action counts.

Look at the suggested websites below to learn the facts and see what others are doing.
